

Daniel Shuen Sheng FUNG

Chief Wellness Officer, NHG Health and Senior Consultant
Department of Developmental Psychiatry, IMH
Adjunct Associate Professor, Lee Kong Chian School of
Medicine, Duke NUS Medical School and Yong Loo Lin
School of Medicine

Research/Innovation Interests (Top 5 areas):

- Neurodevelopmental disorders especially ADHD
- Emotional disorders especially Depression
- Cognitive Behaviour Therapy
- Digital Mental Health
- Child and adolescent mental disorders

Biography

Dr Daniel Fung is a child and adolescent psychiatrist with a strong track record in clinical research, innovation, and health system transformation. He serves as Chief Wellness Officer at NHG Health and Senior Consultant at the Institute of Mental Health (IMH), where he previously held the role of Chief Executive Officer from 2011 to 2026.

His research spans neurodevelopmental and emotional disorders in young people, with particular emphasis on early identification, scalable interventions, and population-based mental health strategies. He has led and contributed to multiple nationally funded studies, including large-scale epidemiological and intervention research supported by the National Medical Research Council and other major funders. A key feature of Dr Fung's work is the translation of research into practice. He has been instrumental in developing community-based and school-linked mental health services, including Singapore's REACH programme, and has contributed to the evolution of tiered and stepped care models for child and adolescent mental health. Dr Fung is also a pioneer in digital mental health innovation, with work spanning web-based cognitive behavioural therapy, mobile applications, and brain-computer interface-based interventions for ADHD. His research reflects a broader interest in how technology, neuroscience, and behavioural science can be integrated to improve access, precision, and outcomes in mental healthcare.

Internationally, he has played a leadership role in advancing the field, serving as President of the International Association for Child and Adolescent Psychiatry and Allied Professions (IACAPAP). His work continues to bridge clinical care, research, education, and policy, with a focus on building sustainable, person-centred mental health systems for children and families.

Selected Publications (Size 12 font)

(To be selected by the CS/CIs, 5-10 most impactful publications and to hyperlink each if available)

Levis, B., Sun, Y., He, C., Wu, Y., Krishnan, A., Bhandari, P. M., ... Fung, D., ... & Thombs, B. D. (2020).
"Accuracy of the PHQ-2 Alone and in Combination With the PHQ-9 for Screening to Detect Major Depression: Systematic Review and Meta-analysis."
JAMA, 323(22), 2290-2300.

Levis, B., Benedetti, A., Thombs, B. D., Riehm, K. E., Saadat, N., ... Fung, D., ... & Cuijpers, P. (2019).
"Accuracy of Patient Health Questionnaire-9 (PHQ-9) for screening to detect major depression: individual participant data meta-analysis."
BMJ, 365:l1476.

Negeri, Z. F., Levis, B., Sun, Y., He, C., Krishnan, A., Wu, Y., ... Fung, D., ... & Thombs, B. D. (2021).
"Accuracy of the Patient Health Questionnaire-9 for screening to detect major depression: updated systematic review and individual participant data meta-analysis."
